Welcome

We appreciate the opportunity to be involved with the design of your staircase.

In this catalog you'll find a selection of parts from some of our vendors, along with samples of our drawings and renderings.

We offer custom built stairs of all types including wood, iron, stainless, glass, spiral and floating structures, exterior railings, full finishing and coating services, design, concept and much more!

Creative, Design, Build

WHERE EVERY STAIR IS A MASTERPIECE

The stair is typically what you first see as you enter a home. We design and build every staircase as a piece of art.

The concept of the finished product can be conceived from our designers pencil to a picture submitted.

We love to suggest the little details that will give the final product distinction and flair for a one of a kind functional piece of art.

OVER 25 YEARS OF EXPERIENCE

With structural engineering and building codes in mind we look forward to the opportunity to stretch the imagination with cutting edge designs and make it all happen.

With over 25 years of experience we bring the very best in quality, knowledge and craftsmanship to contractors, designers, architects and ultimately owners.

CONCEPT TO INSPIRATION

All our stair parts are made in America and we display this proudly!

Please check out our gallery with examples of styles such as Contemporary, European, Classical, Modern, Industrial and Mid Century.

If you can dream it, we can build it!

WOOD WORKING

Our woodworking shop has the capability to turn out custom woodwork pieces. We also design and build casework for under the staircase such as bookcases, cabinetry and storage.

From one of a kind furniture pieces, home theater, libraries, entertainment centers, fireplace treatments and specialty custom woodwork.

DESIGN CENTER

We appreciate the opportunity to be involved with the design of your staircase.

Please visit our website at www.artstaircase.com to view samples of our drawings and renderings.

Final CAD drawings are always submitted for final approval and we hope you find it useful for identifying final selections.
